PASSENGER AREA

CONTROL GONDOLA

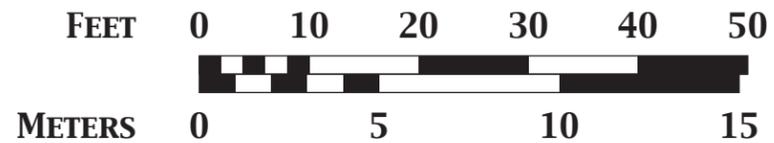

ENGINE CAR (FORWARD)

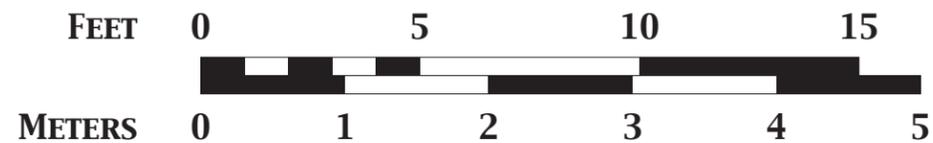

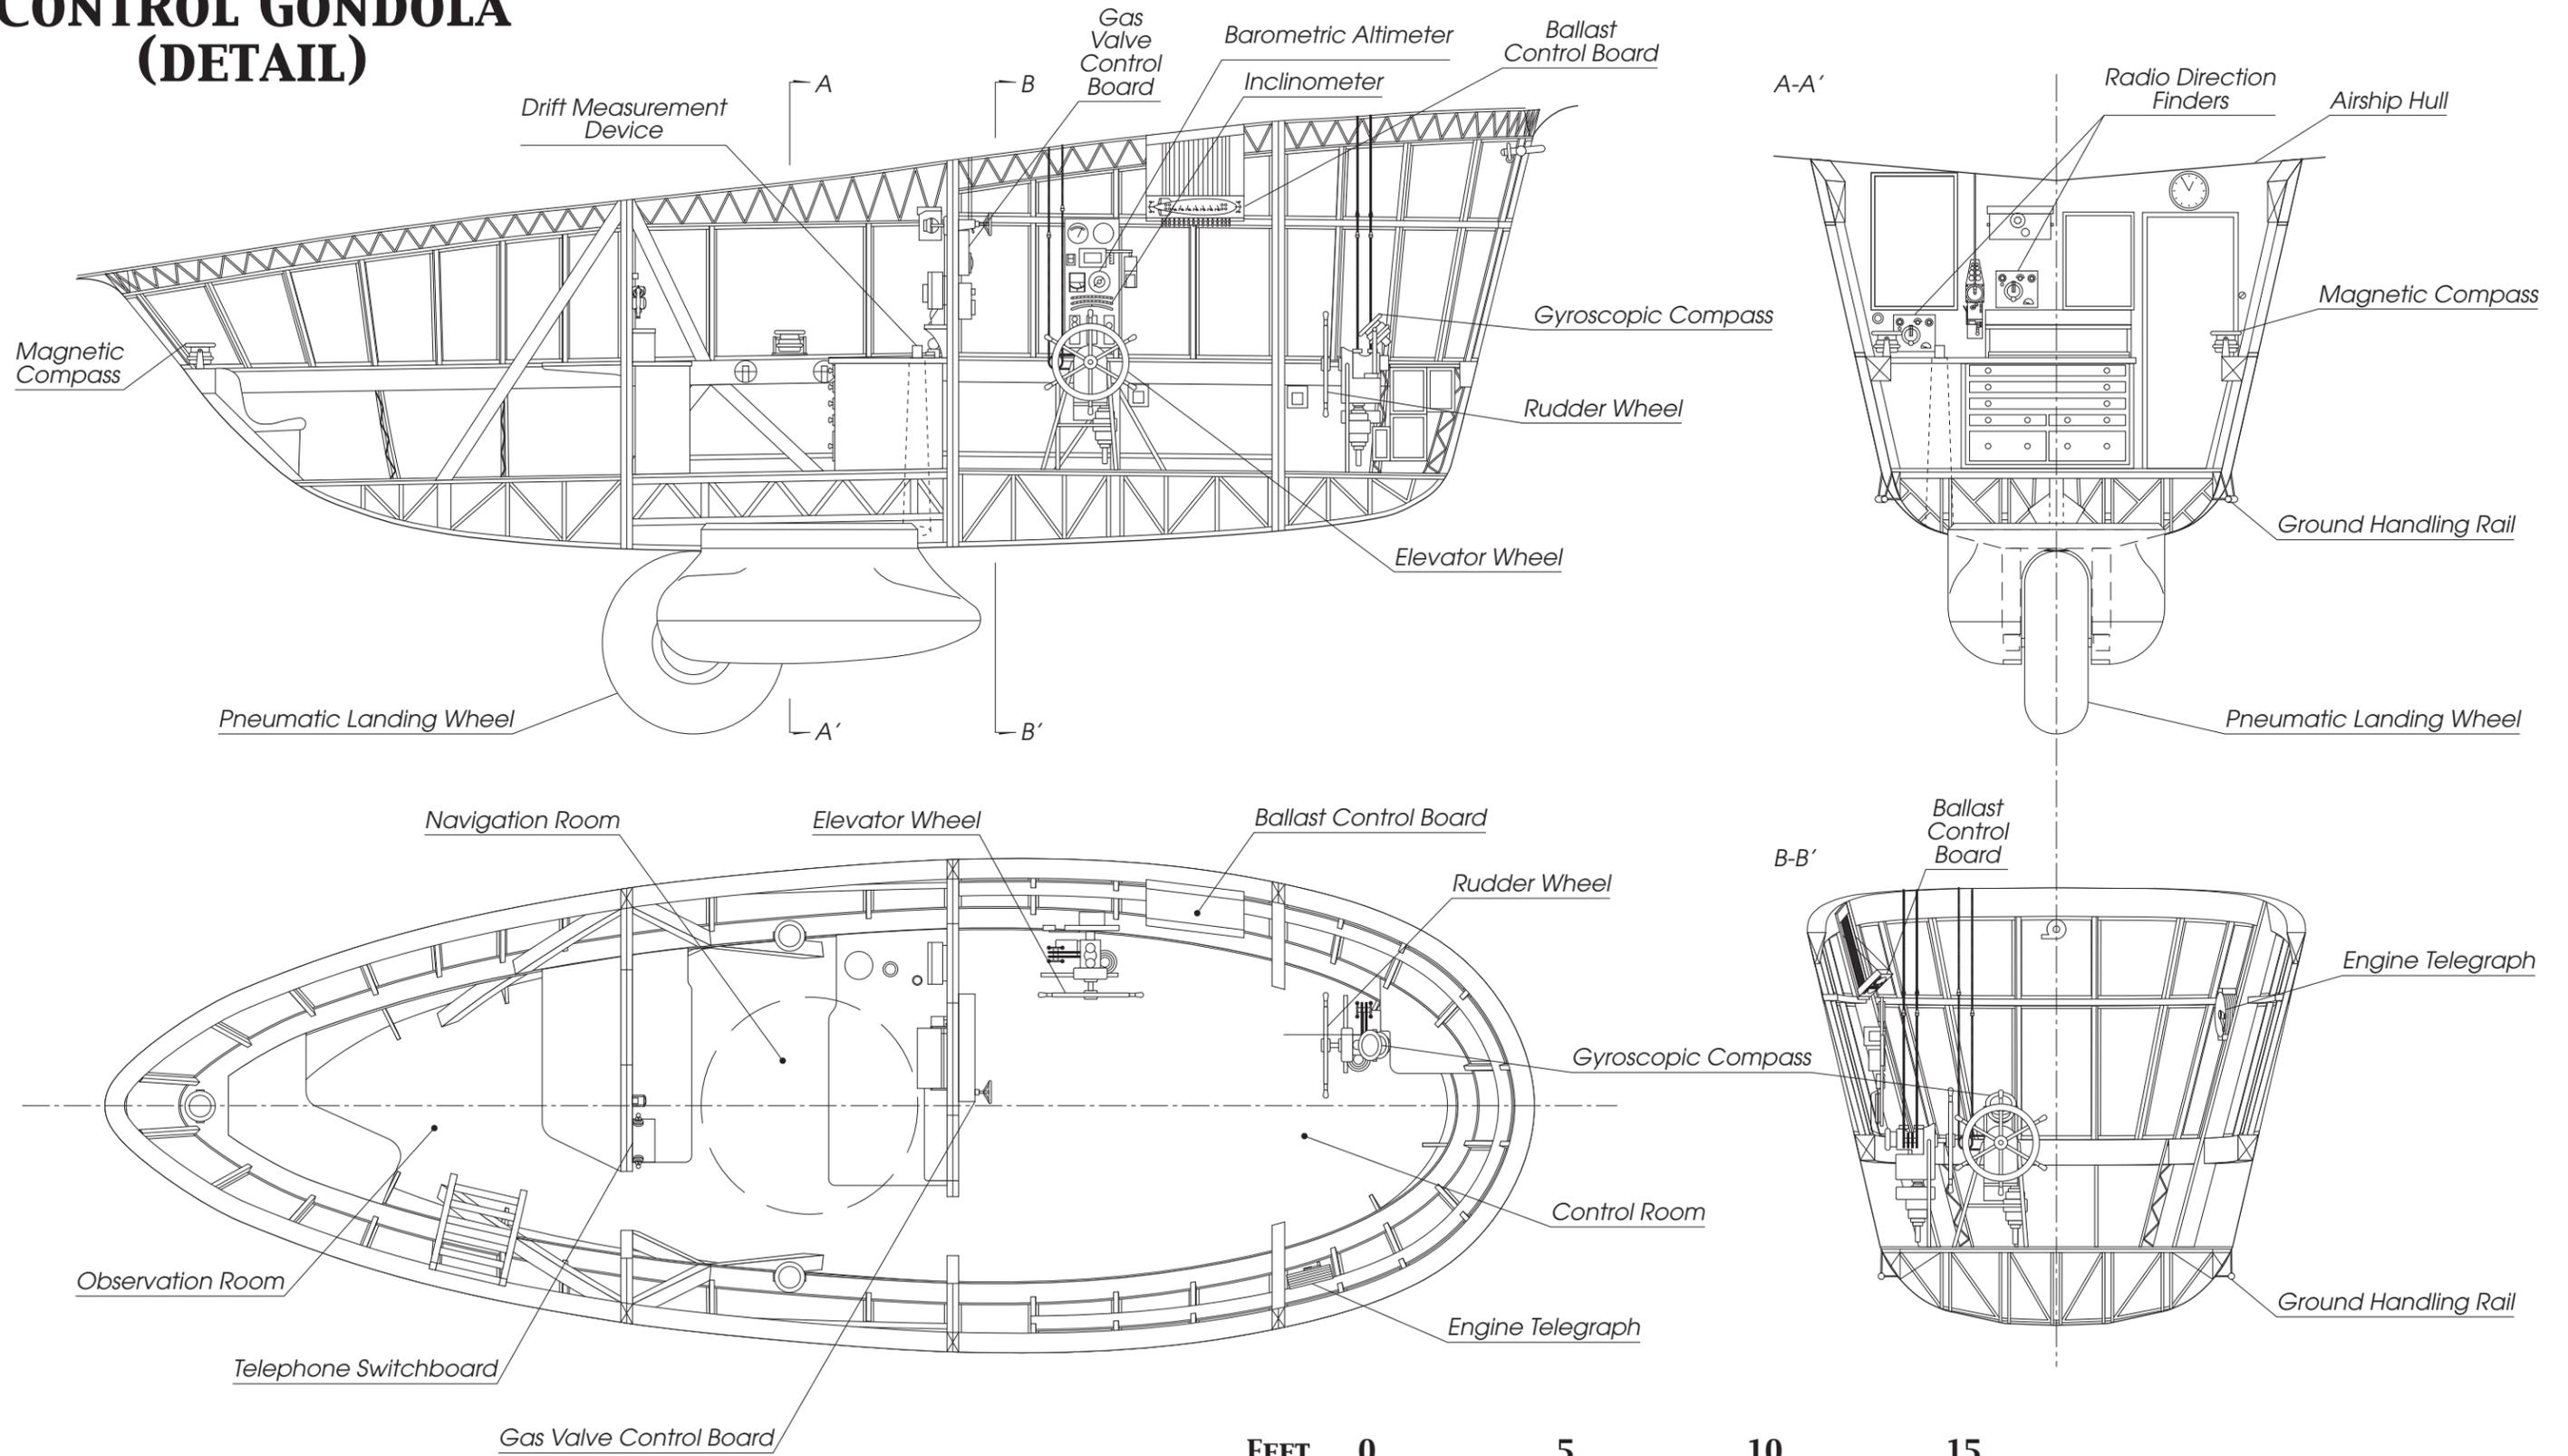

4 Engine Cars
 Forward Engine Cars mounted 4° outward from ship's axis
 Aft Engine Cars mounted at 3° outward from ship's axis

Engine specifications:
 Daimler Benz LOF 6 diesel
 V16, 4 valve per cylinder
 770 kW (1050 hp) maximum at 1500 rpm
 690 kW (940 hp) cruising at 1350 rpm
 225 g/kWh (0.37 lbs./hp/h) fuel consumption (cruising)

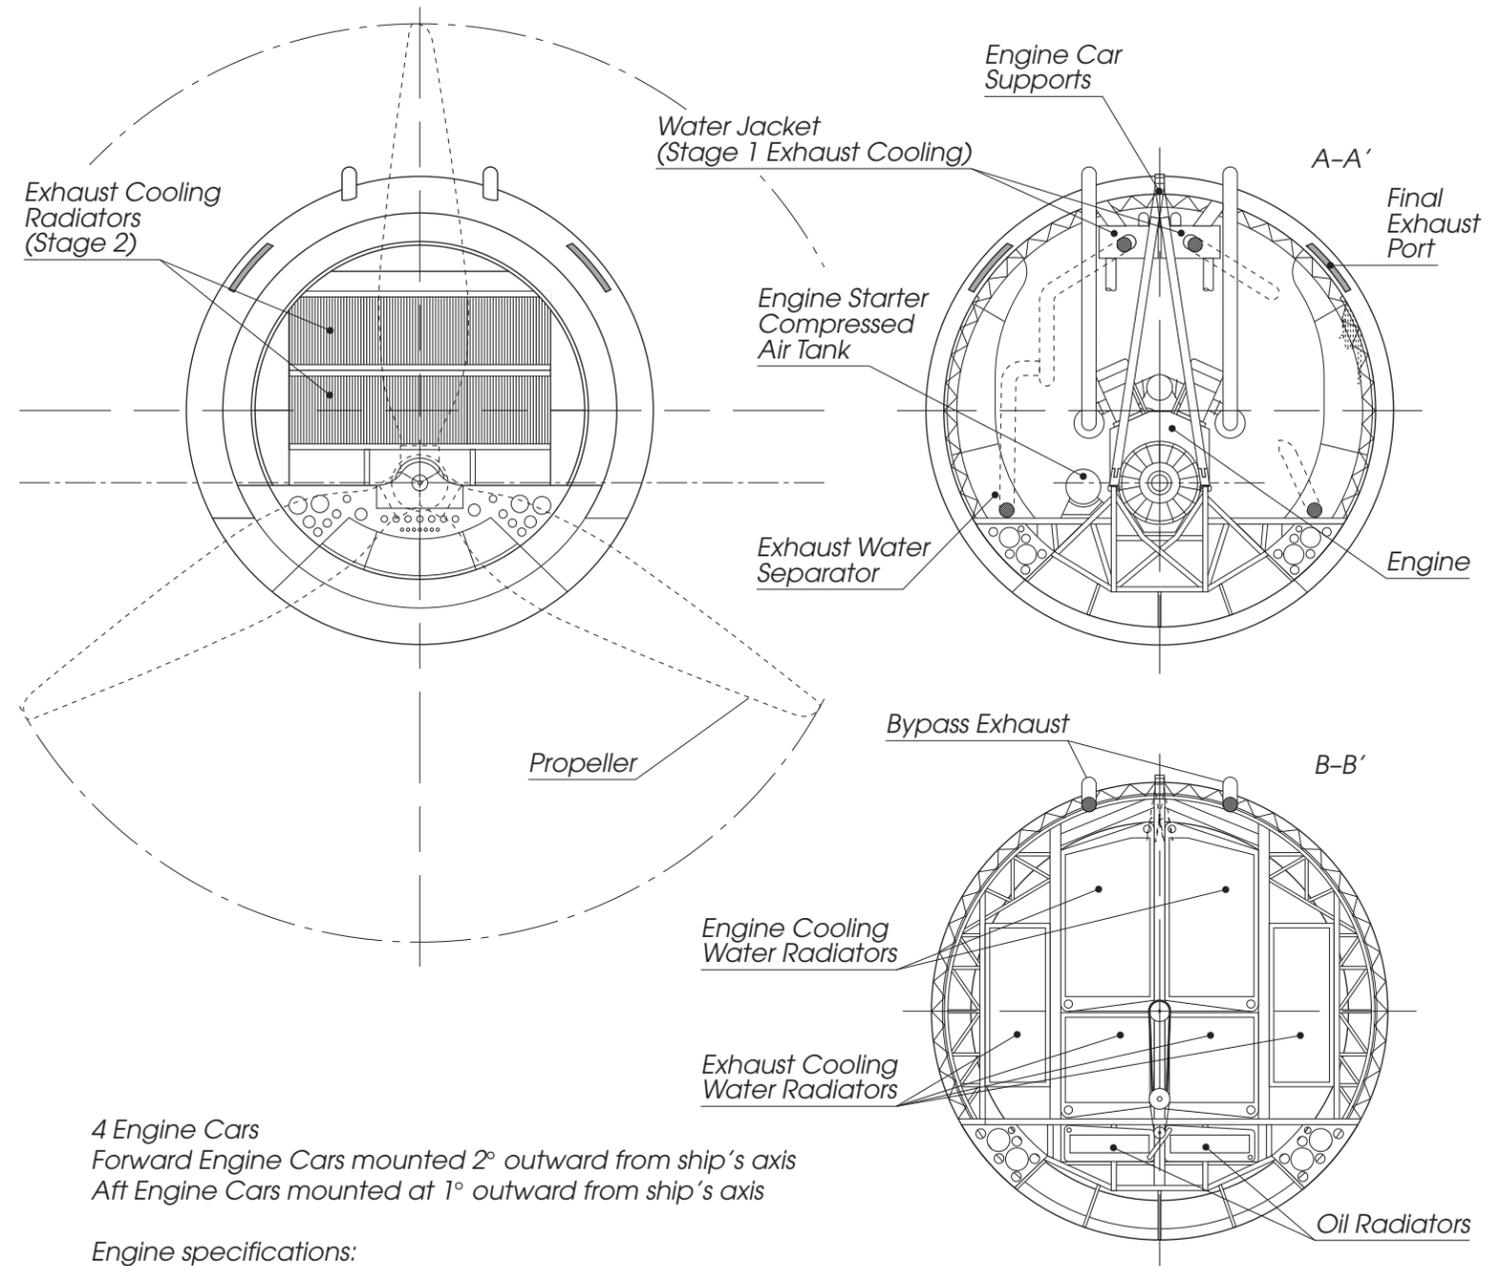

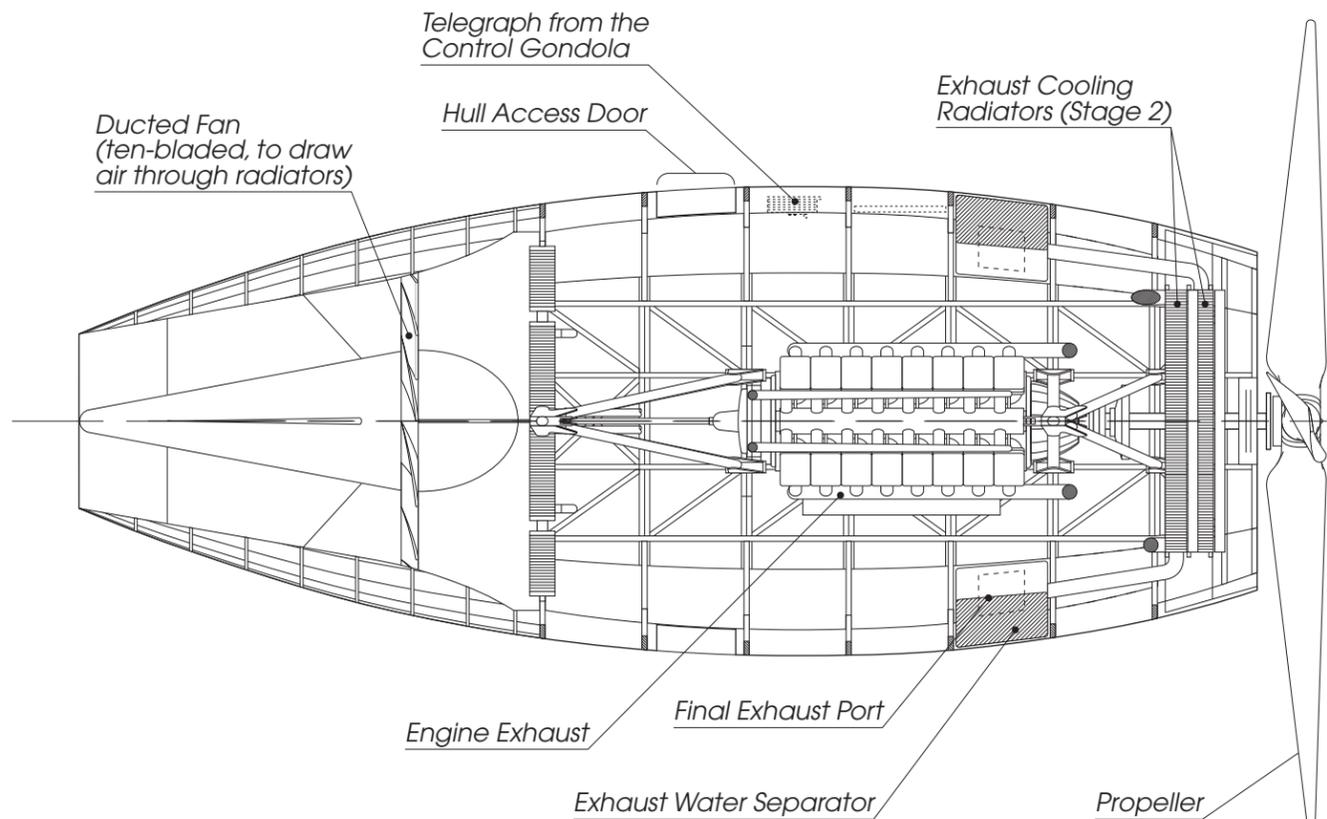

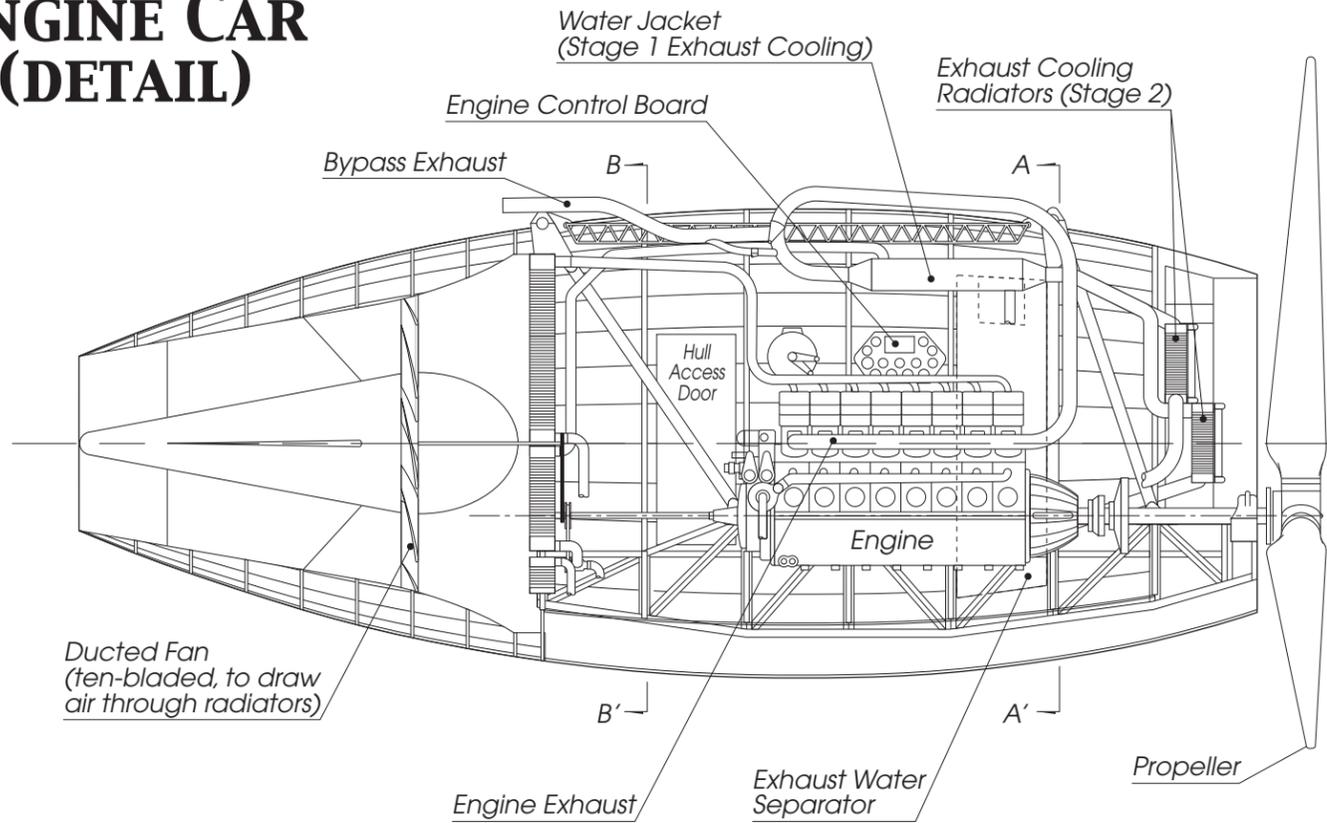

CONTROL GONDOLA (DETAIL)

SCALE 1/50

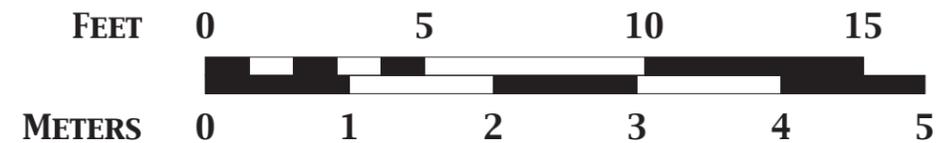

ENGINE CAR (DETAIL)

4 Engine Cars
 Forward Engine Cars mounted 2° outward from ship's axis
 Aft Engine Cars mounted at 1° outward from ship's axis

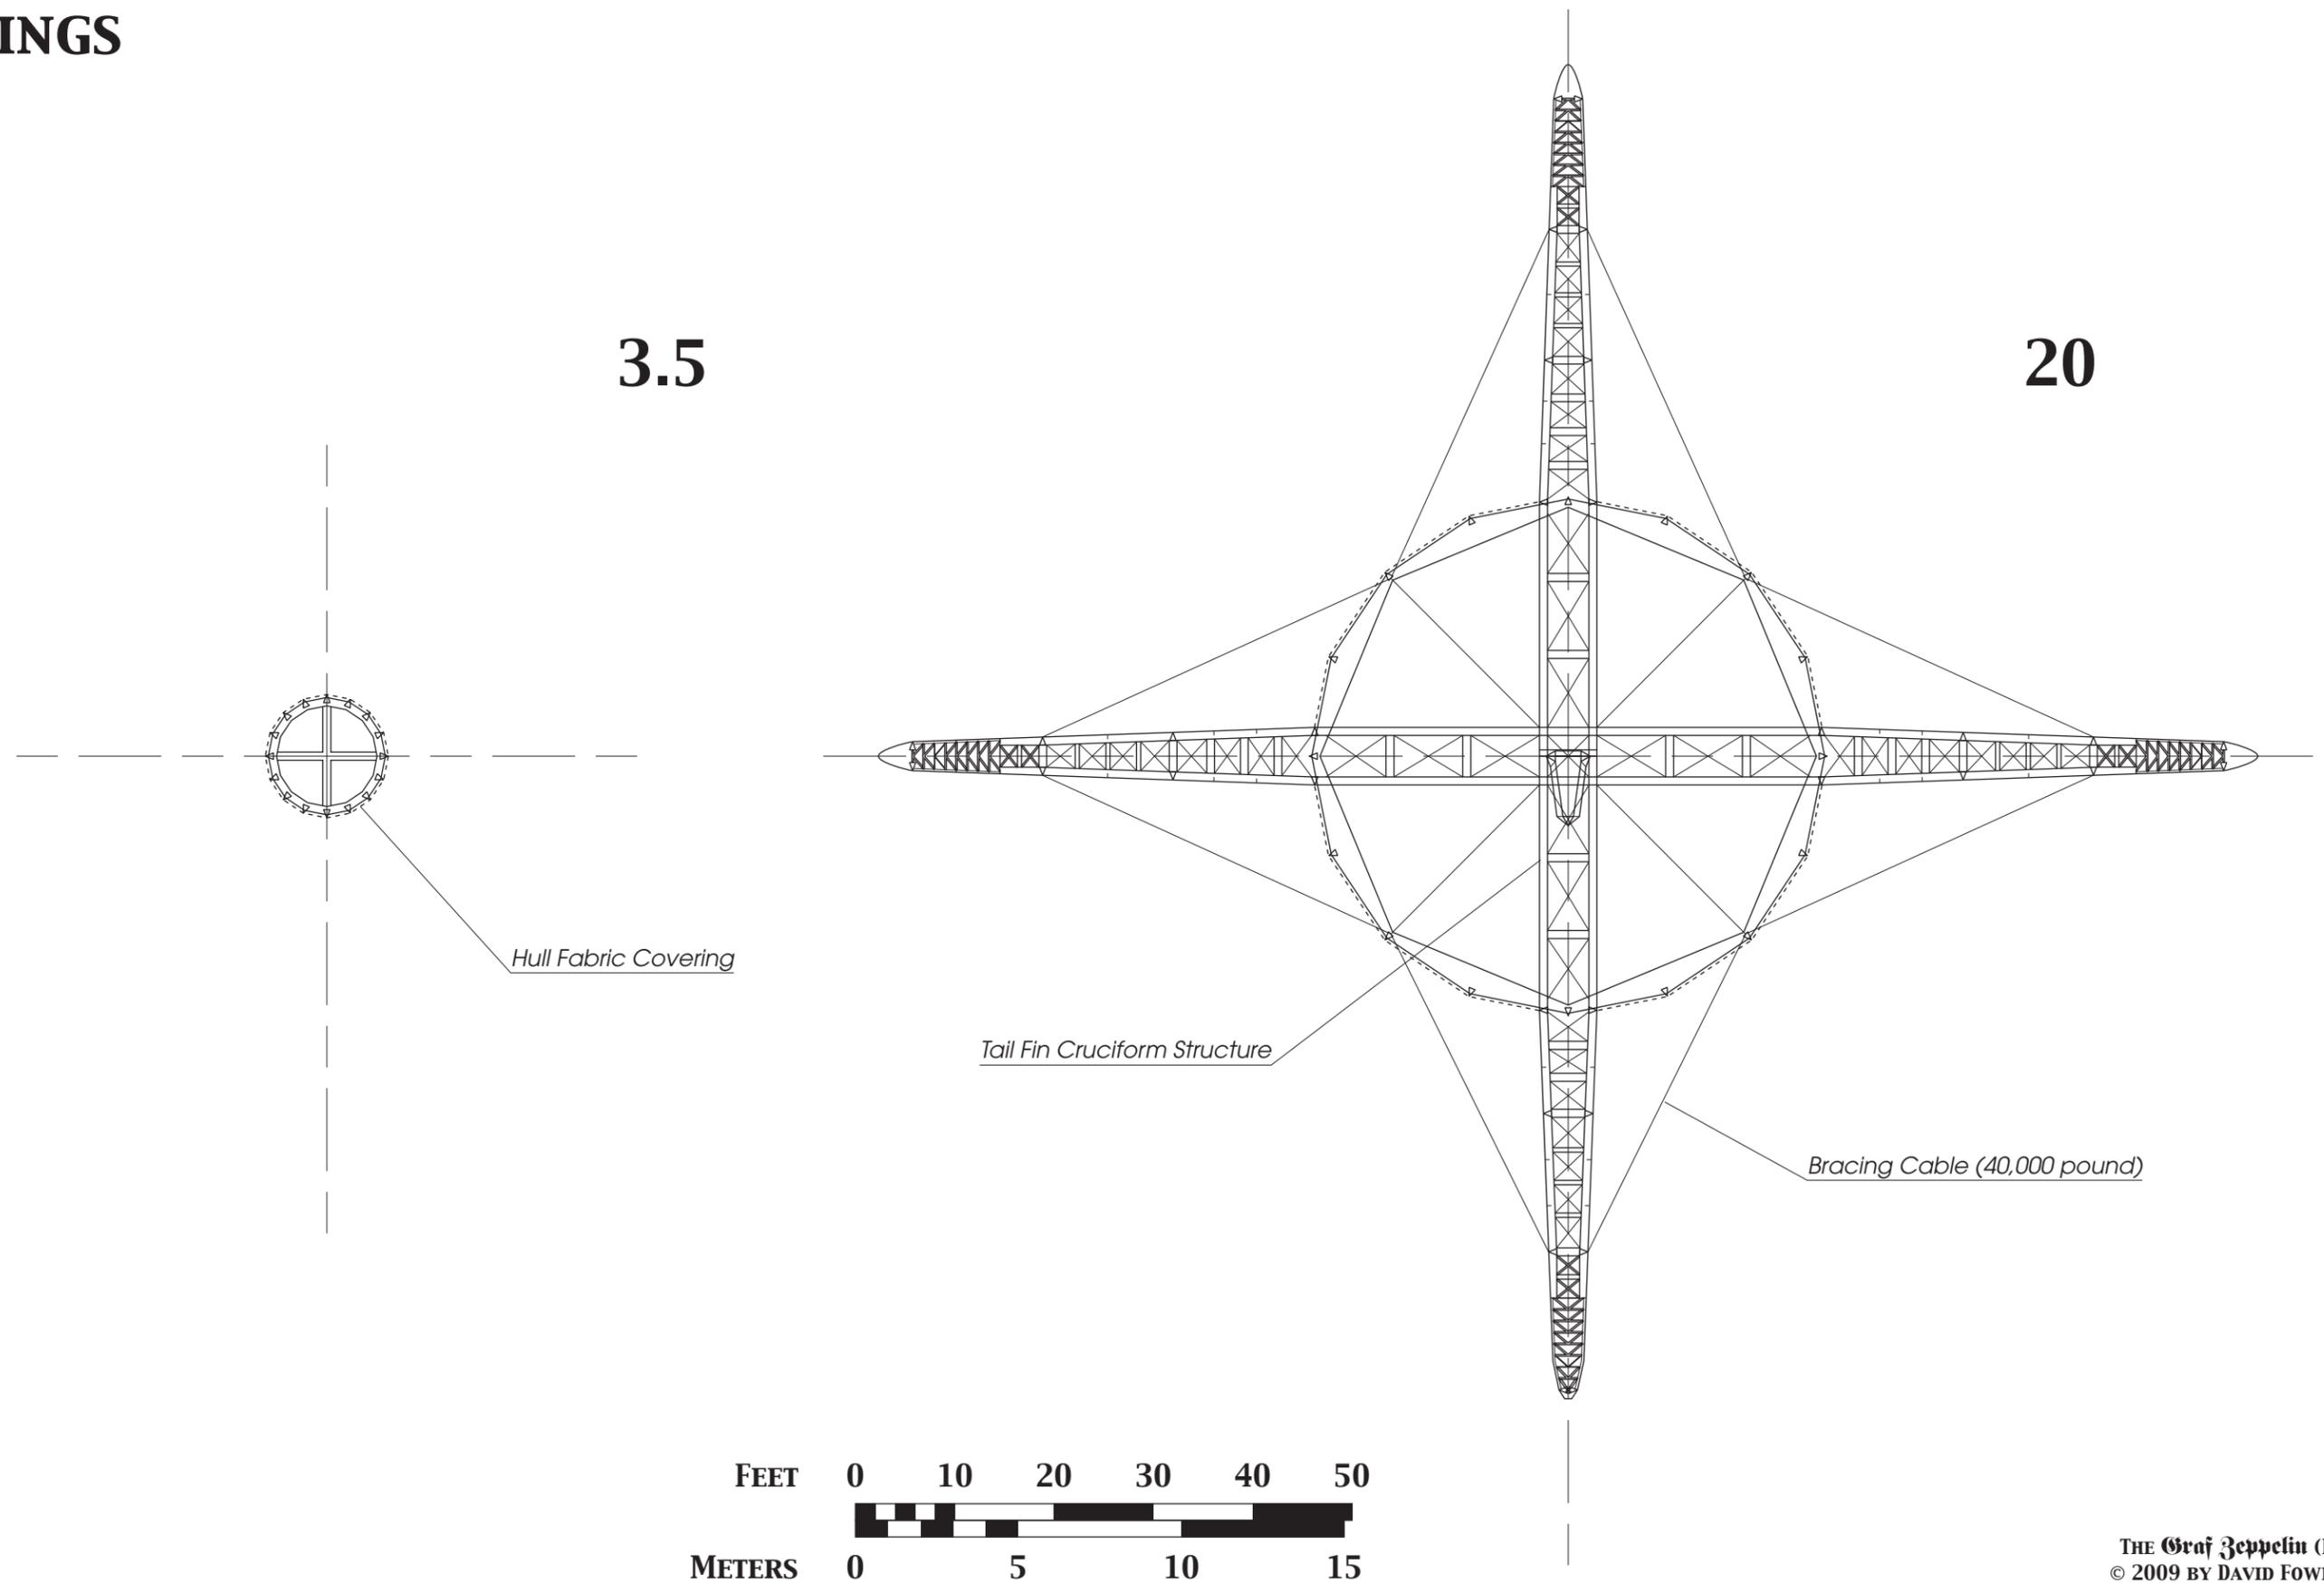

Engine specifications:
 Daimler Benz LOF 6 diesel
 V16, 4 valve per cylinder

Exhaust cooling system to reclaim water for ballast.
 Stage 1: Cool Water Jacket (temperature in = 400°C, temperature out = 50°C)
 Stage 2: Cooling Radiator (temperature in = 50°C, temperature out = 20°C)
 Final: Water is condensed and separated from the exhaust in collector (baffles) and transferred to ballast water tanks and bladders within the airship.

MAIN RINGS

INTERMEDIATE RINGS

178

(looking aft)

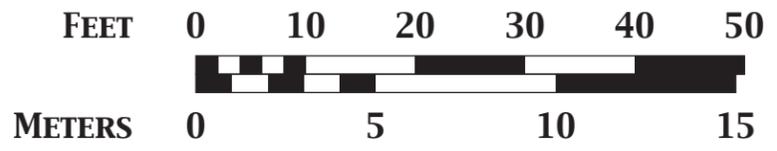

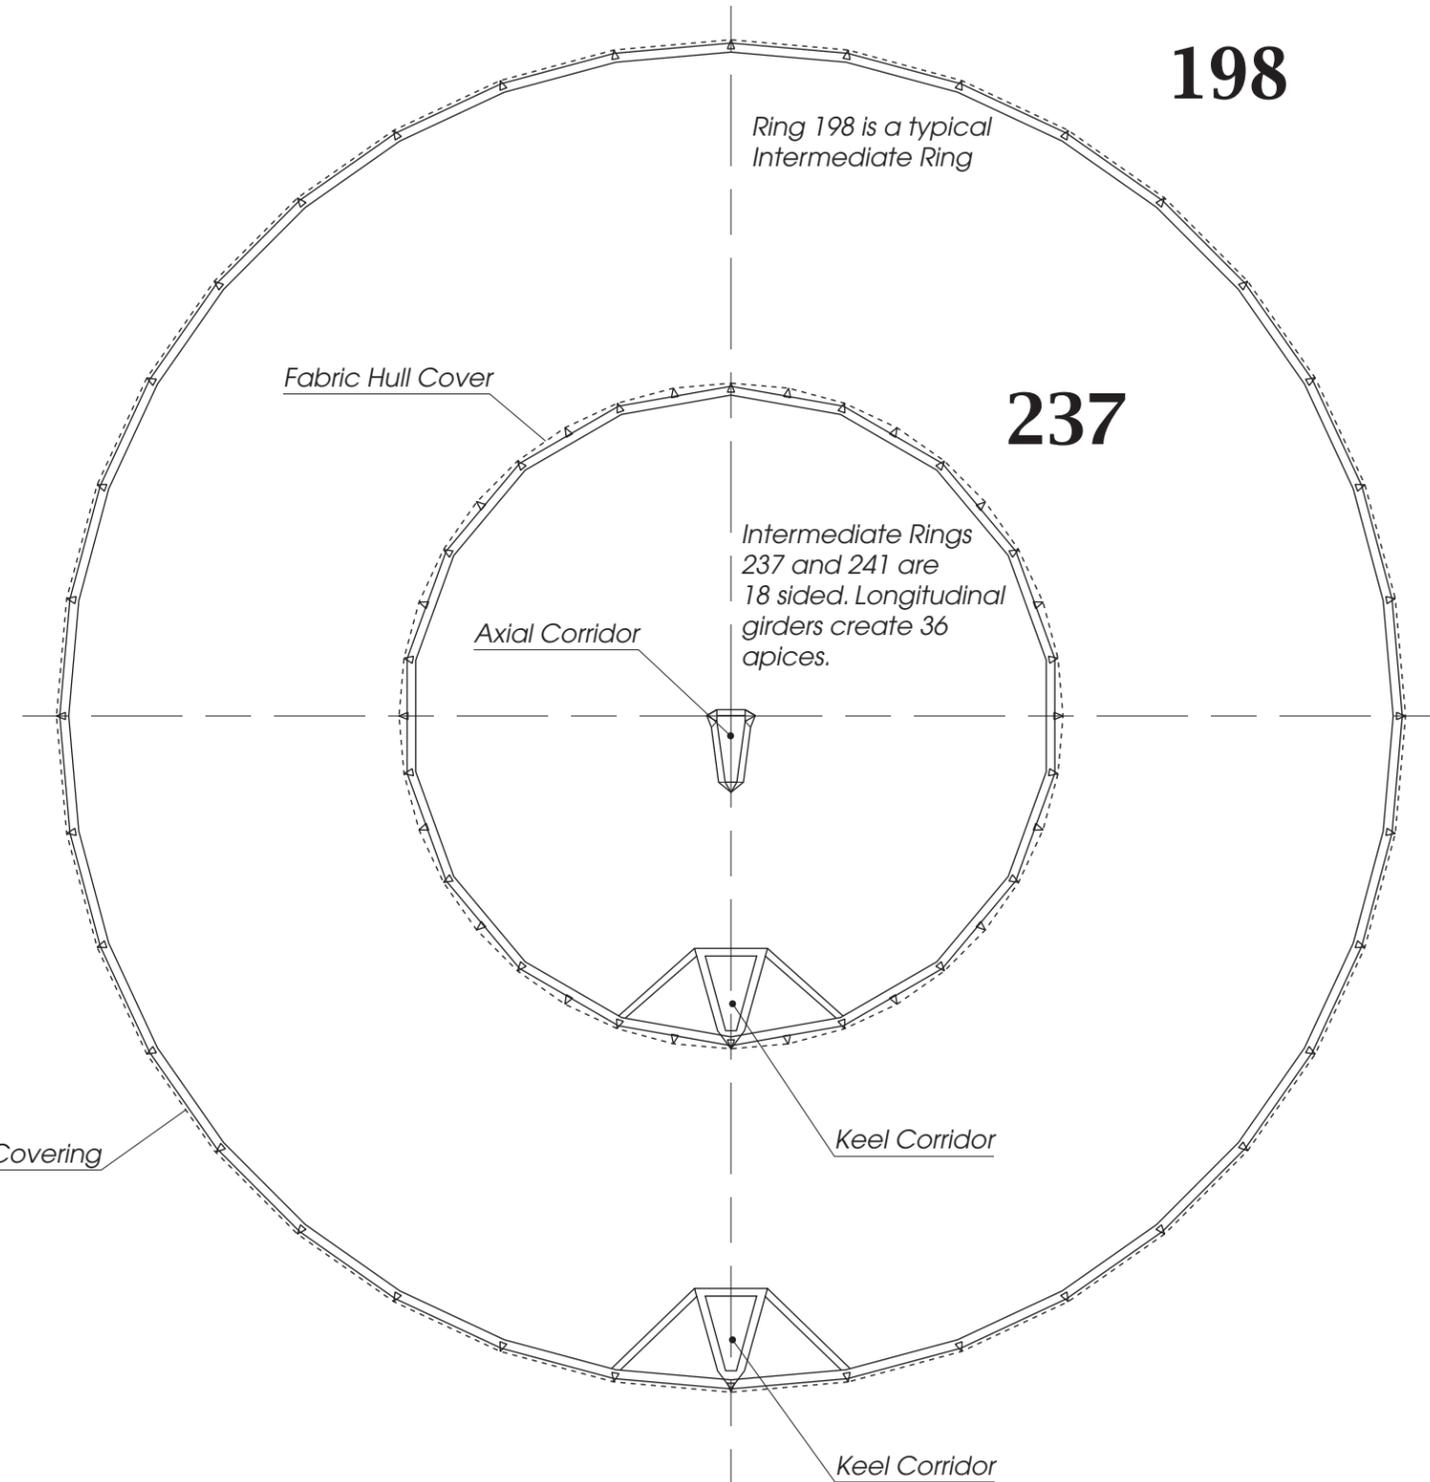

198

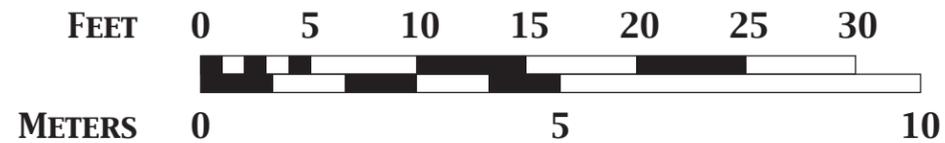

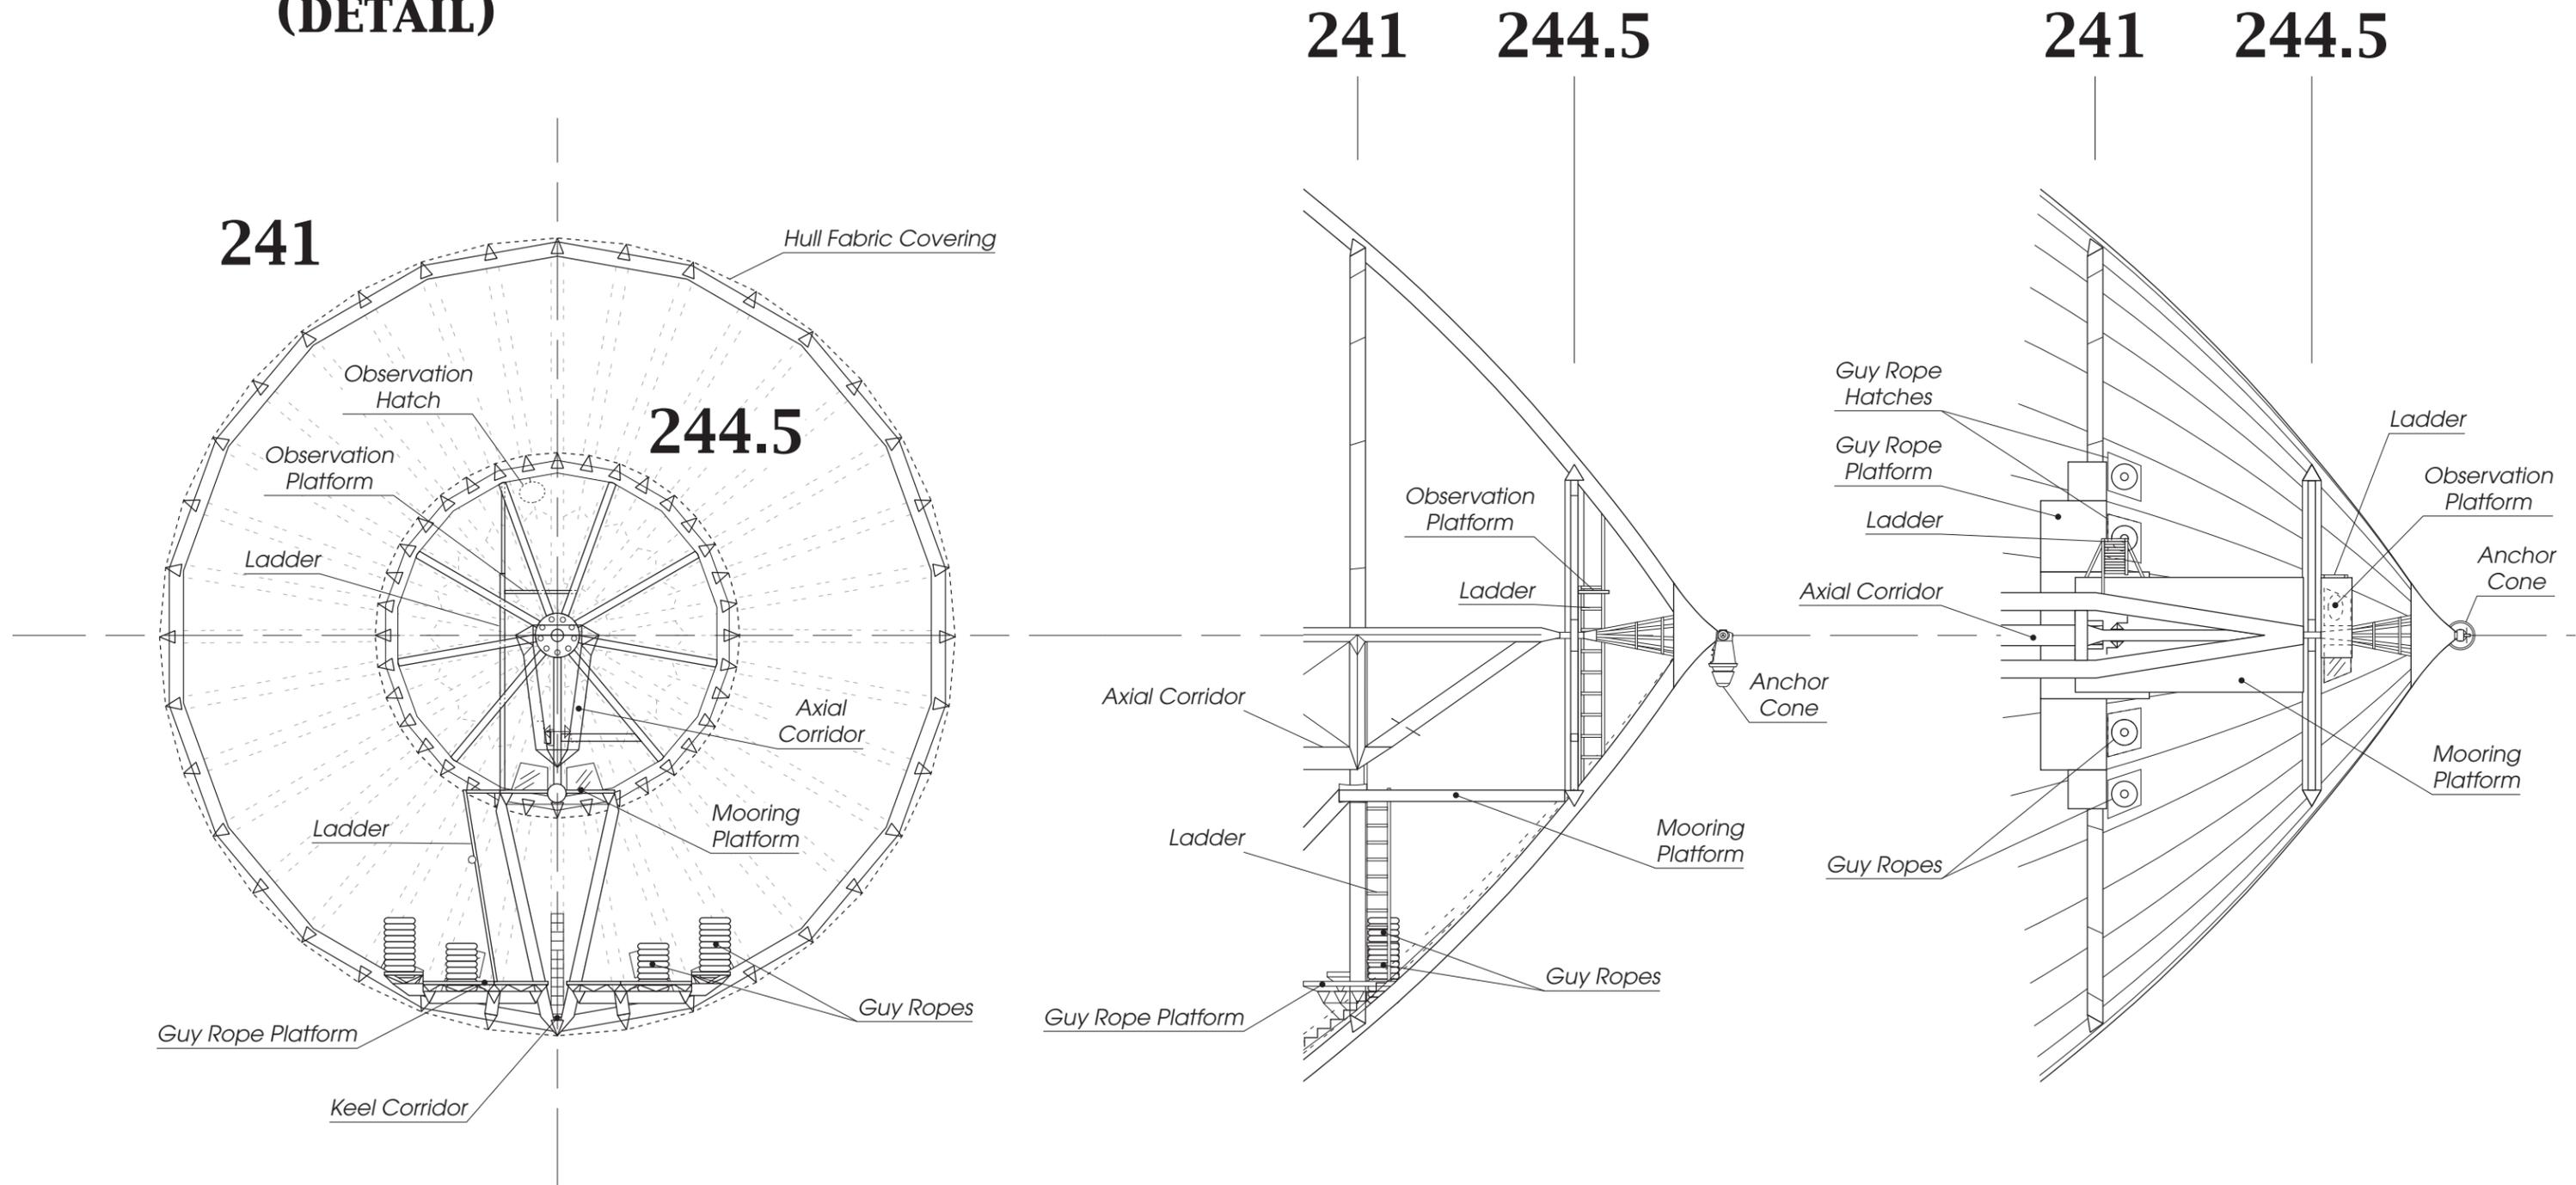

Ring 198 is a typical Intermediate Ring

237

Intermediate Rings 237 and 241 are 18 sided. Longitudinal girders create 36 apices.

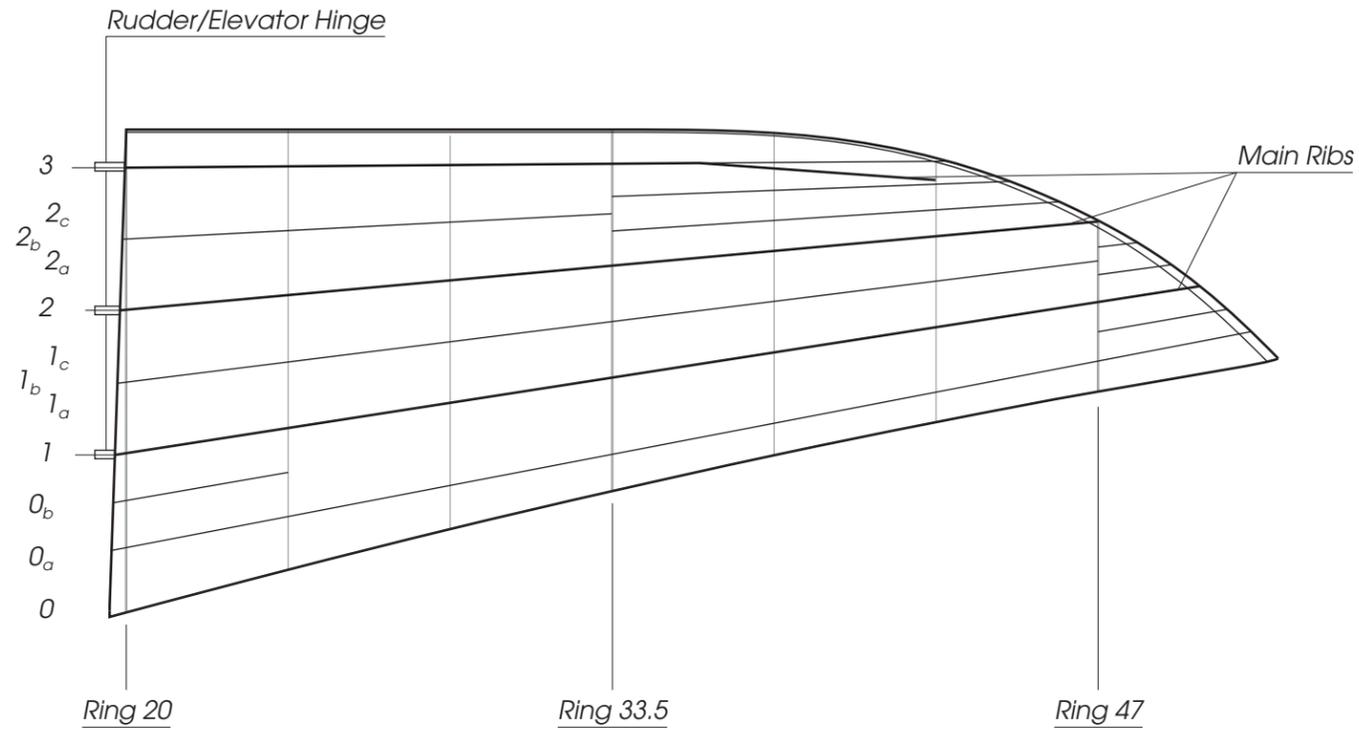

BOW MOORING AREA (DETAIL)

SCALE 1/100

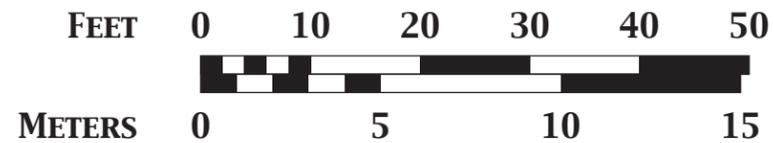

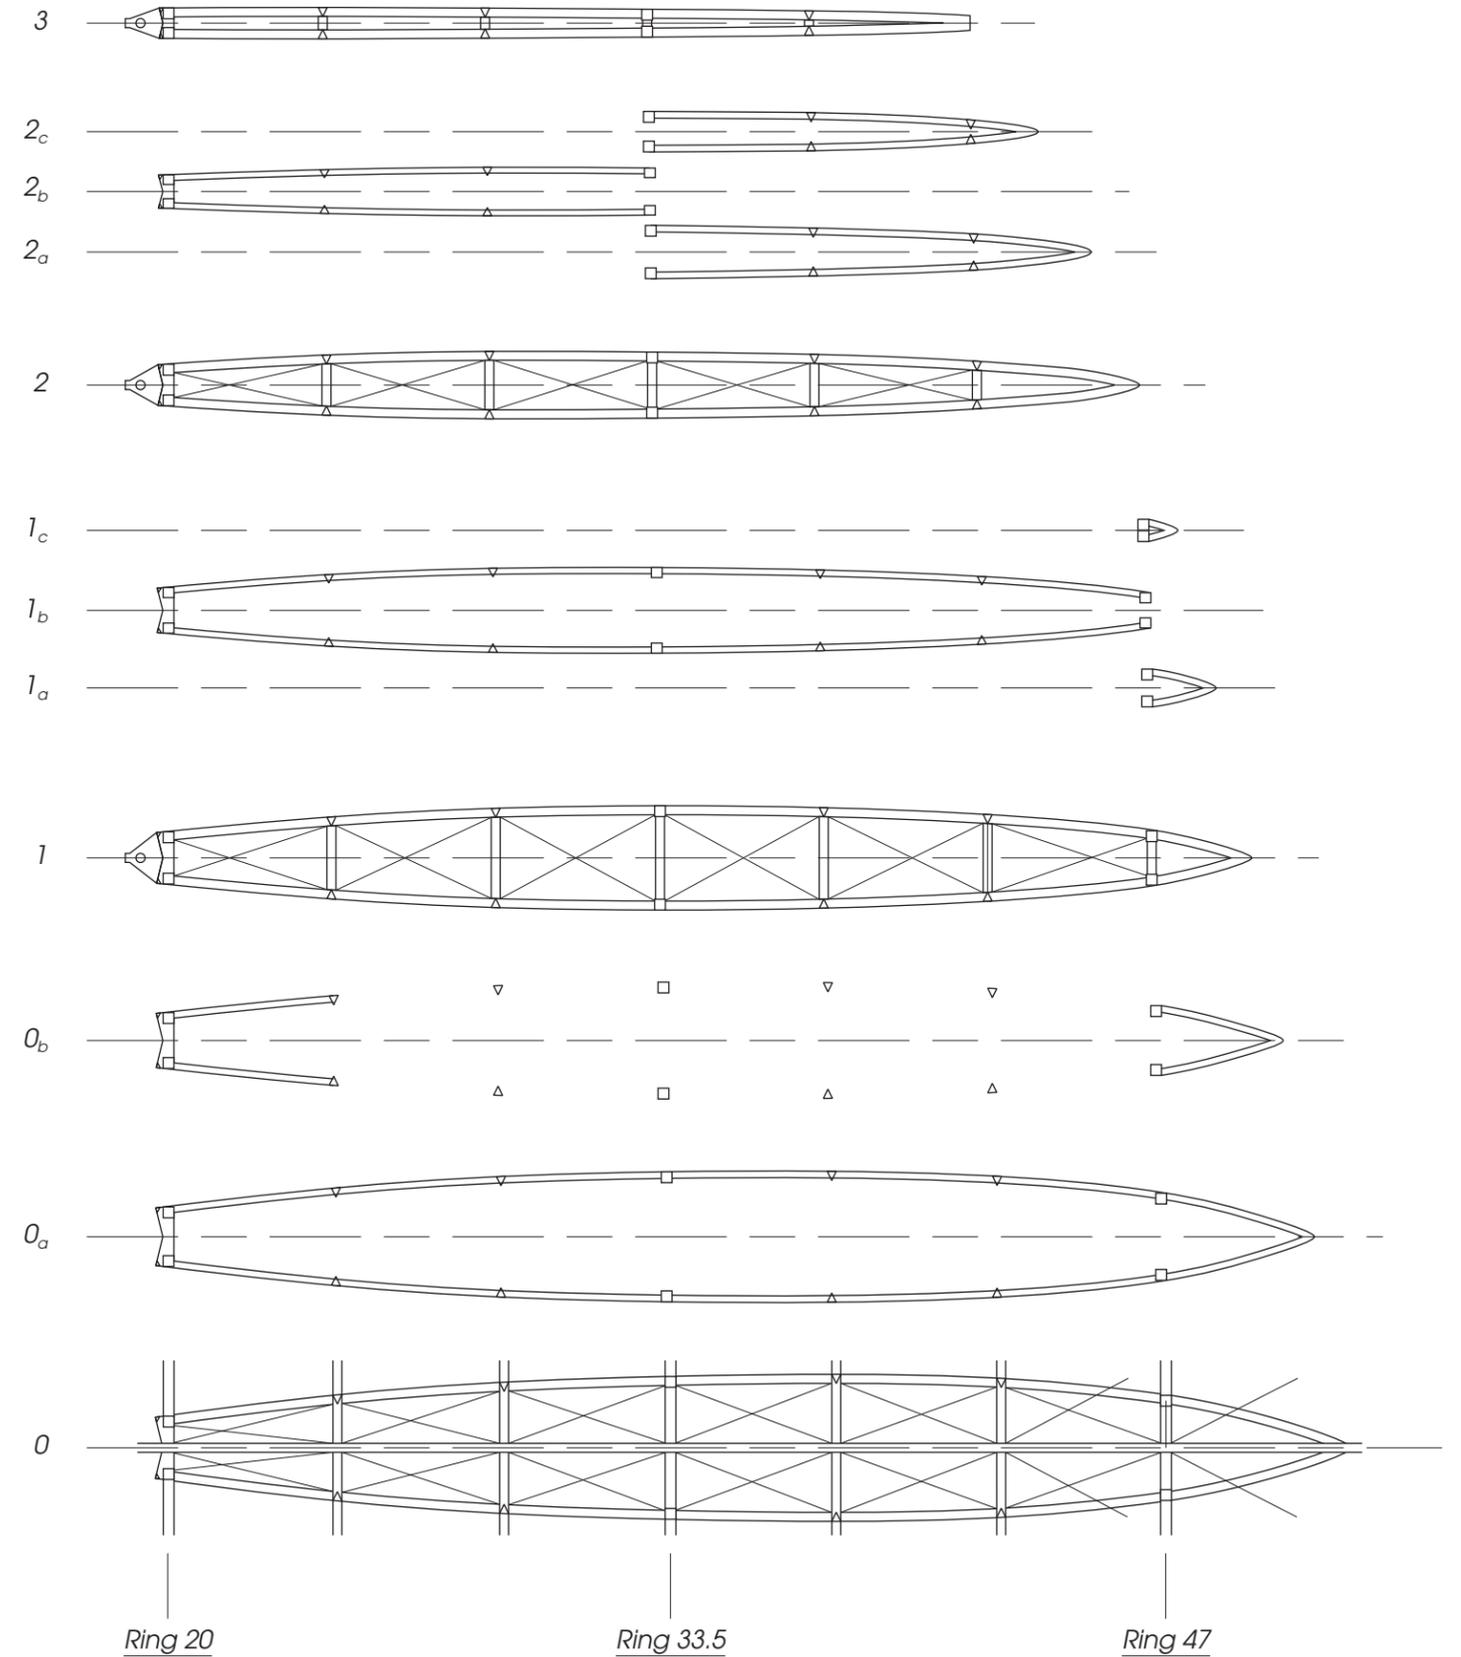

TAIL STRUCTURE

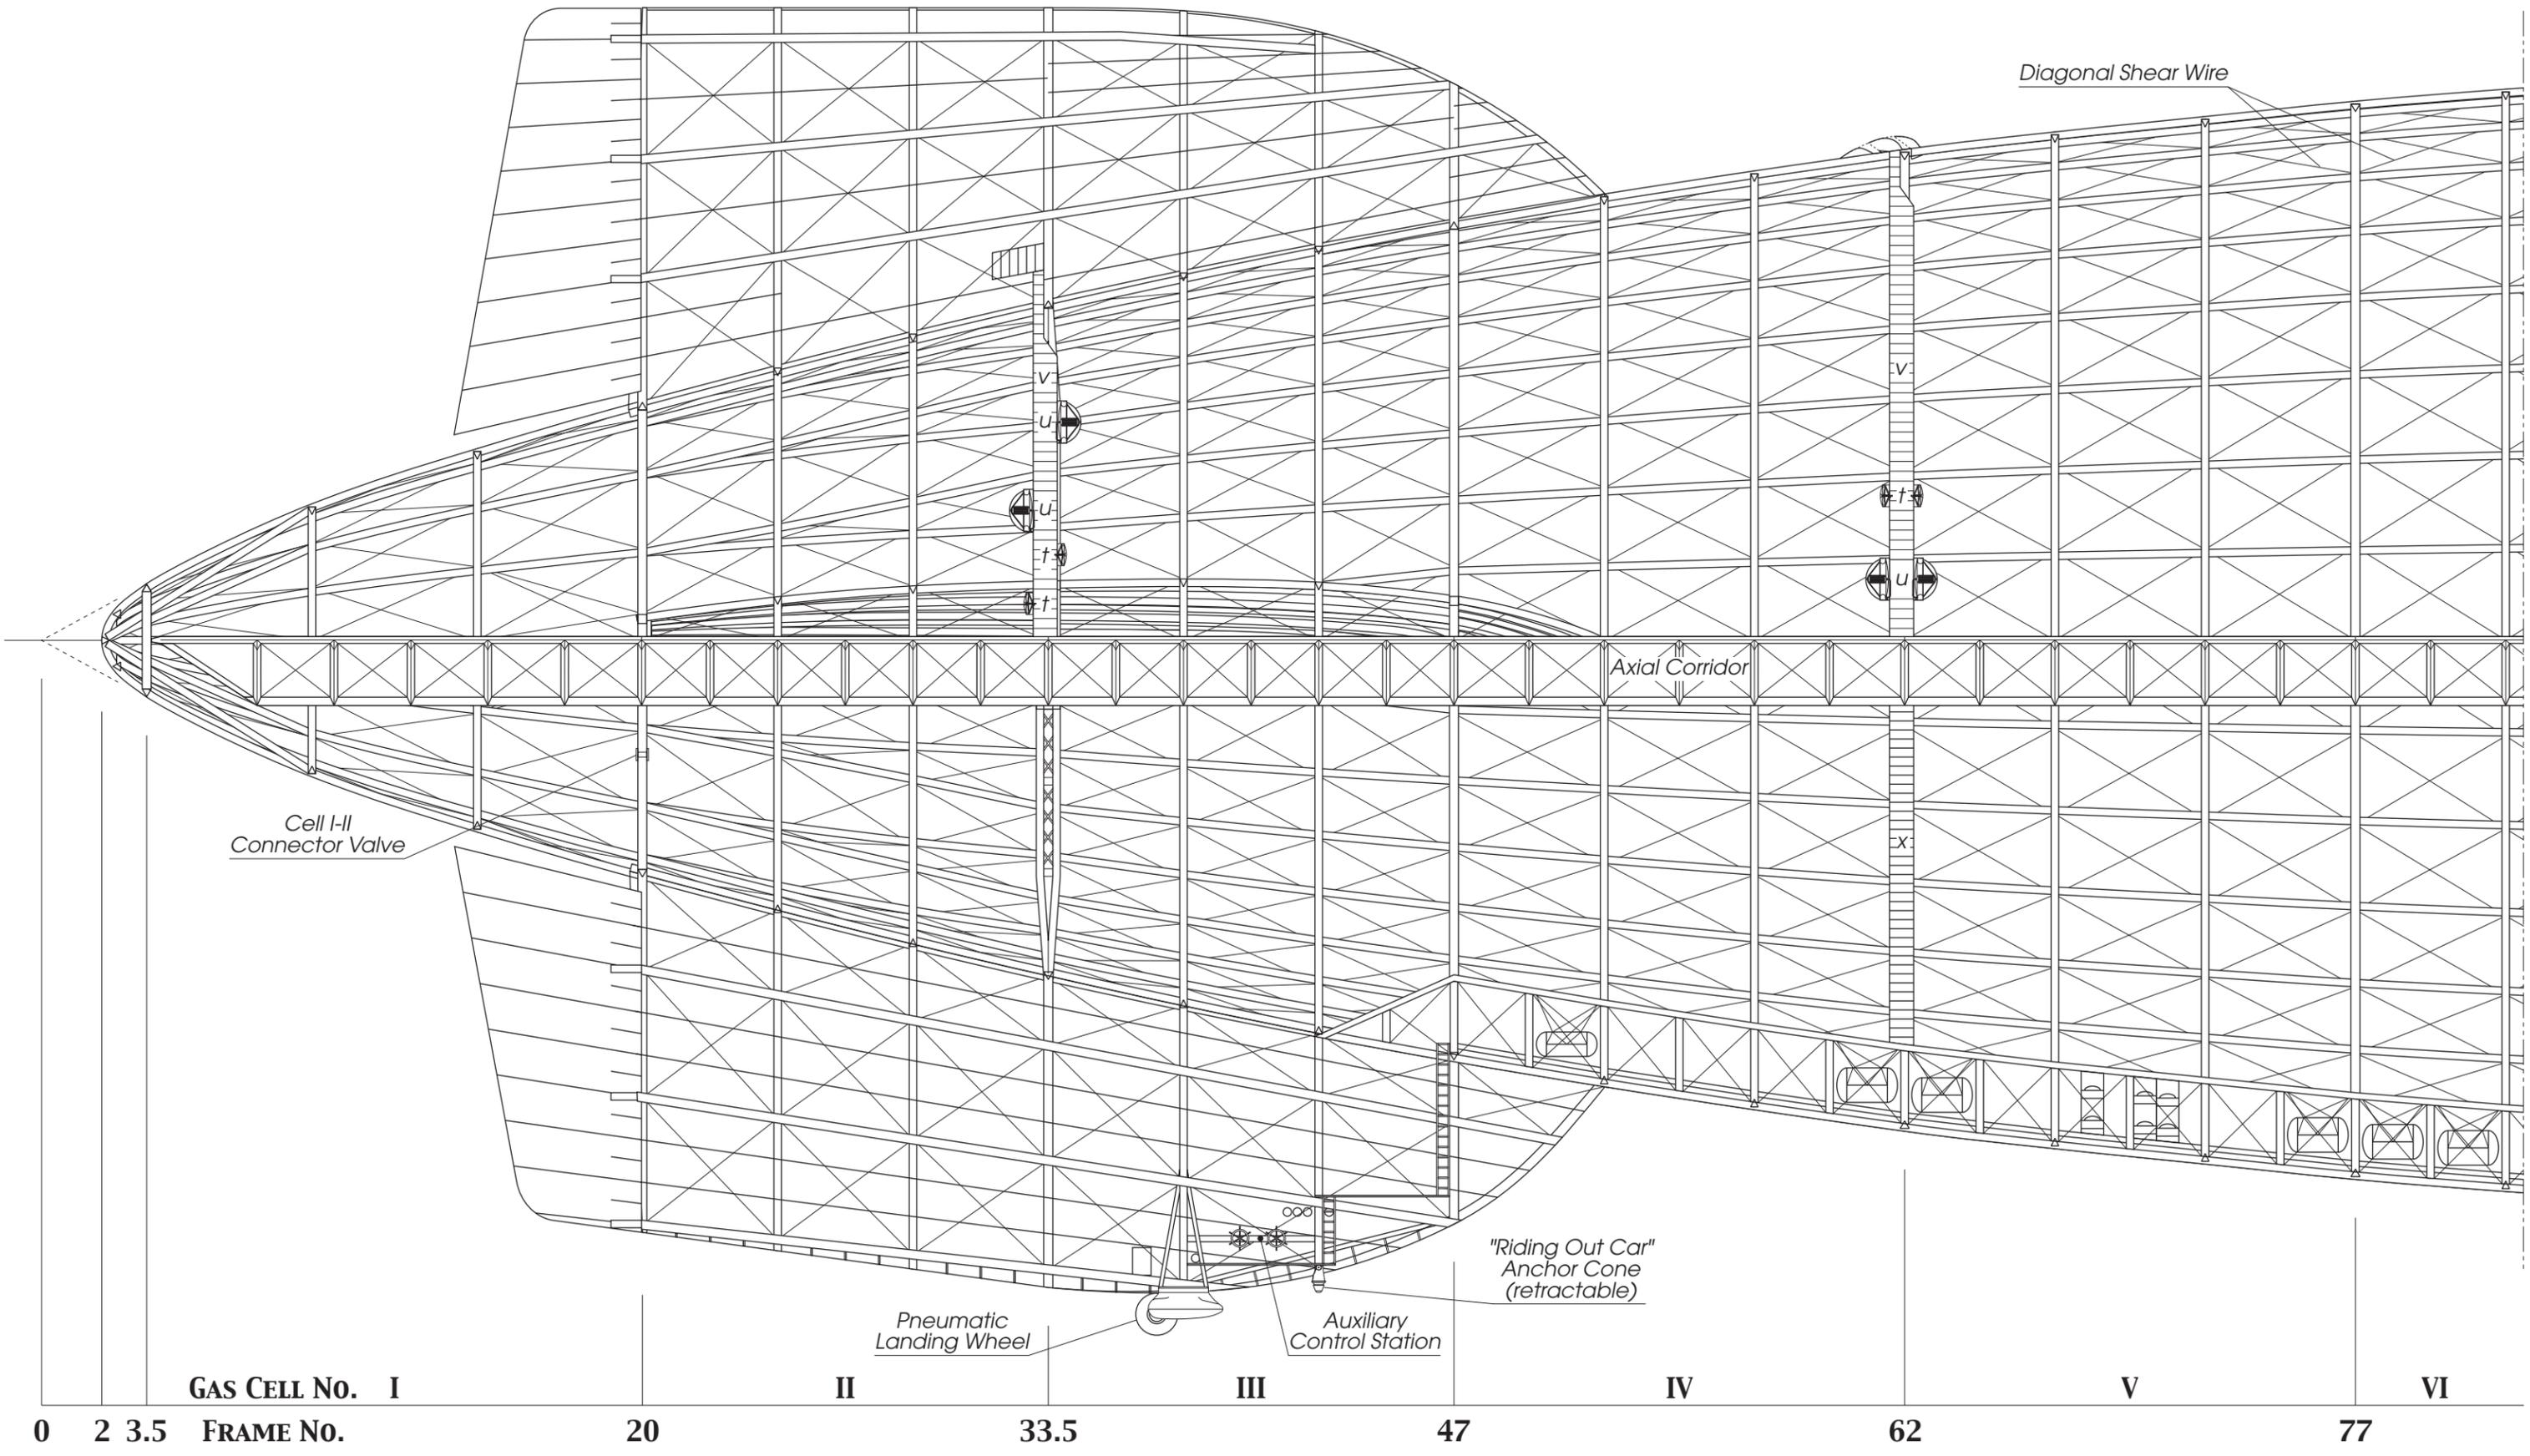

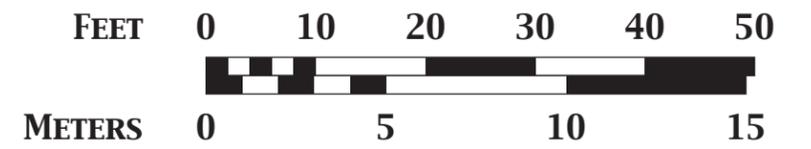

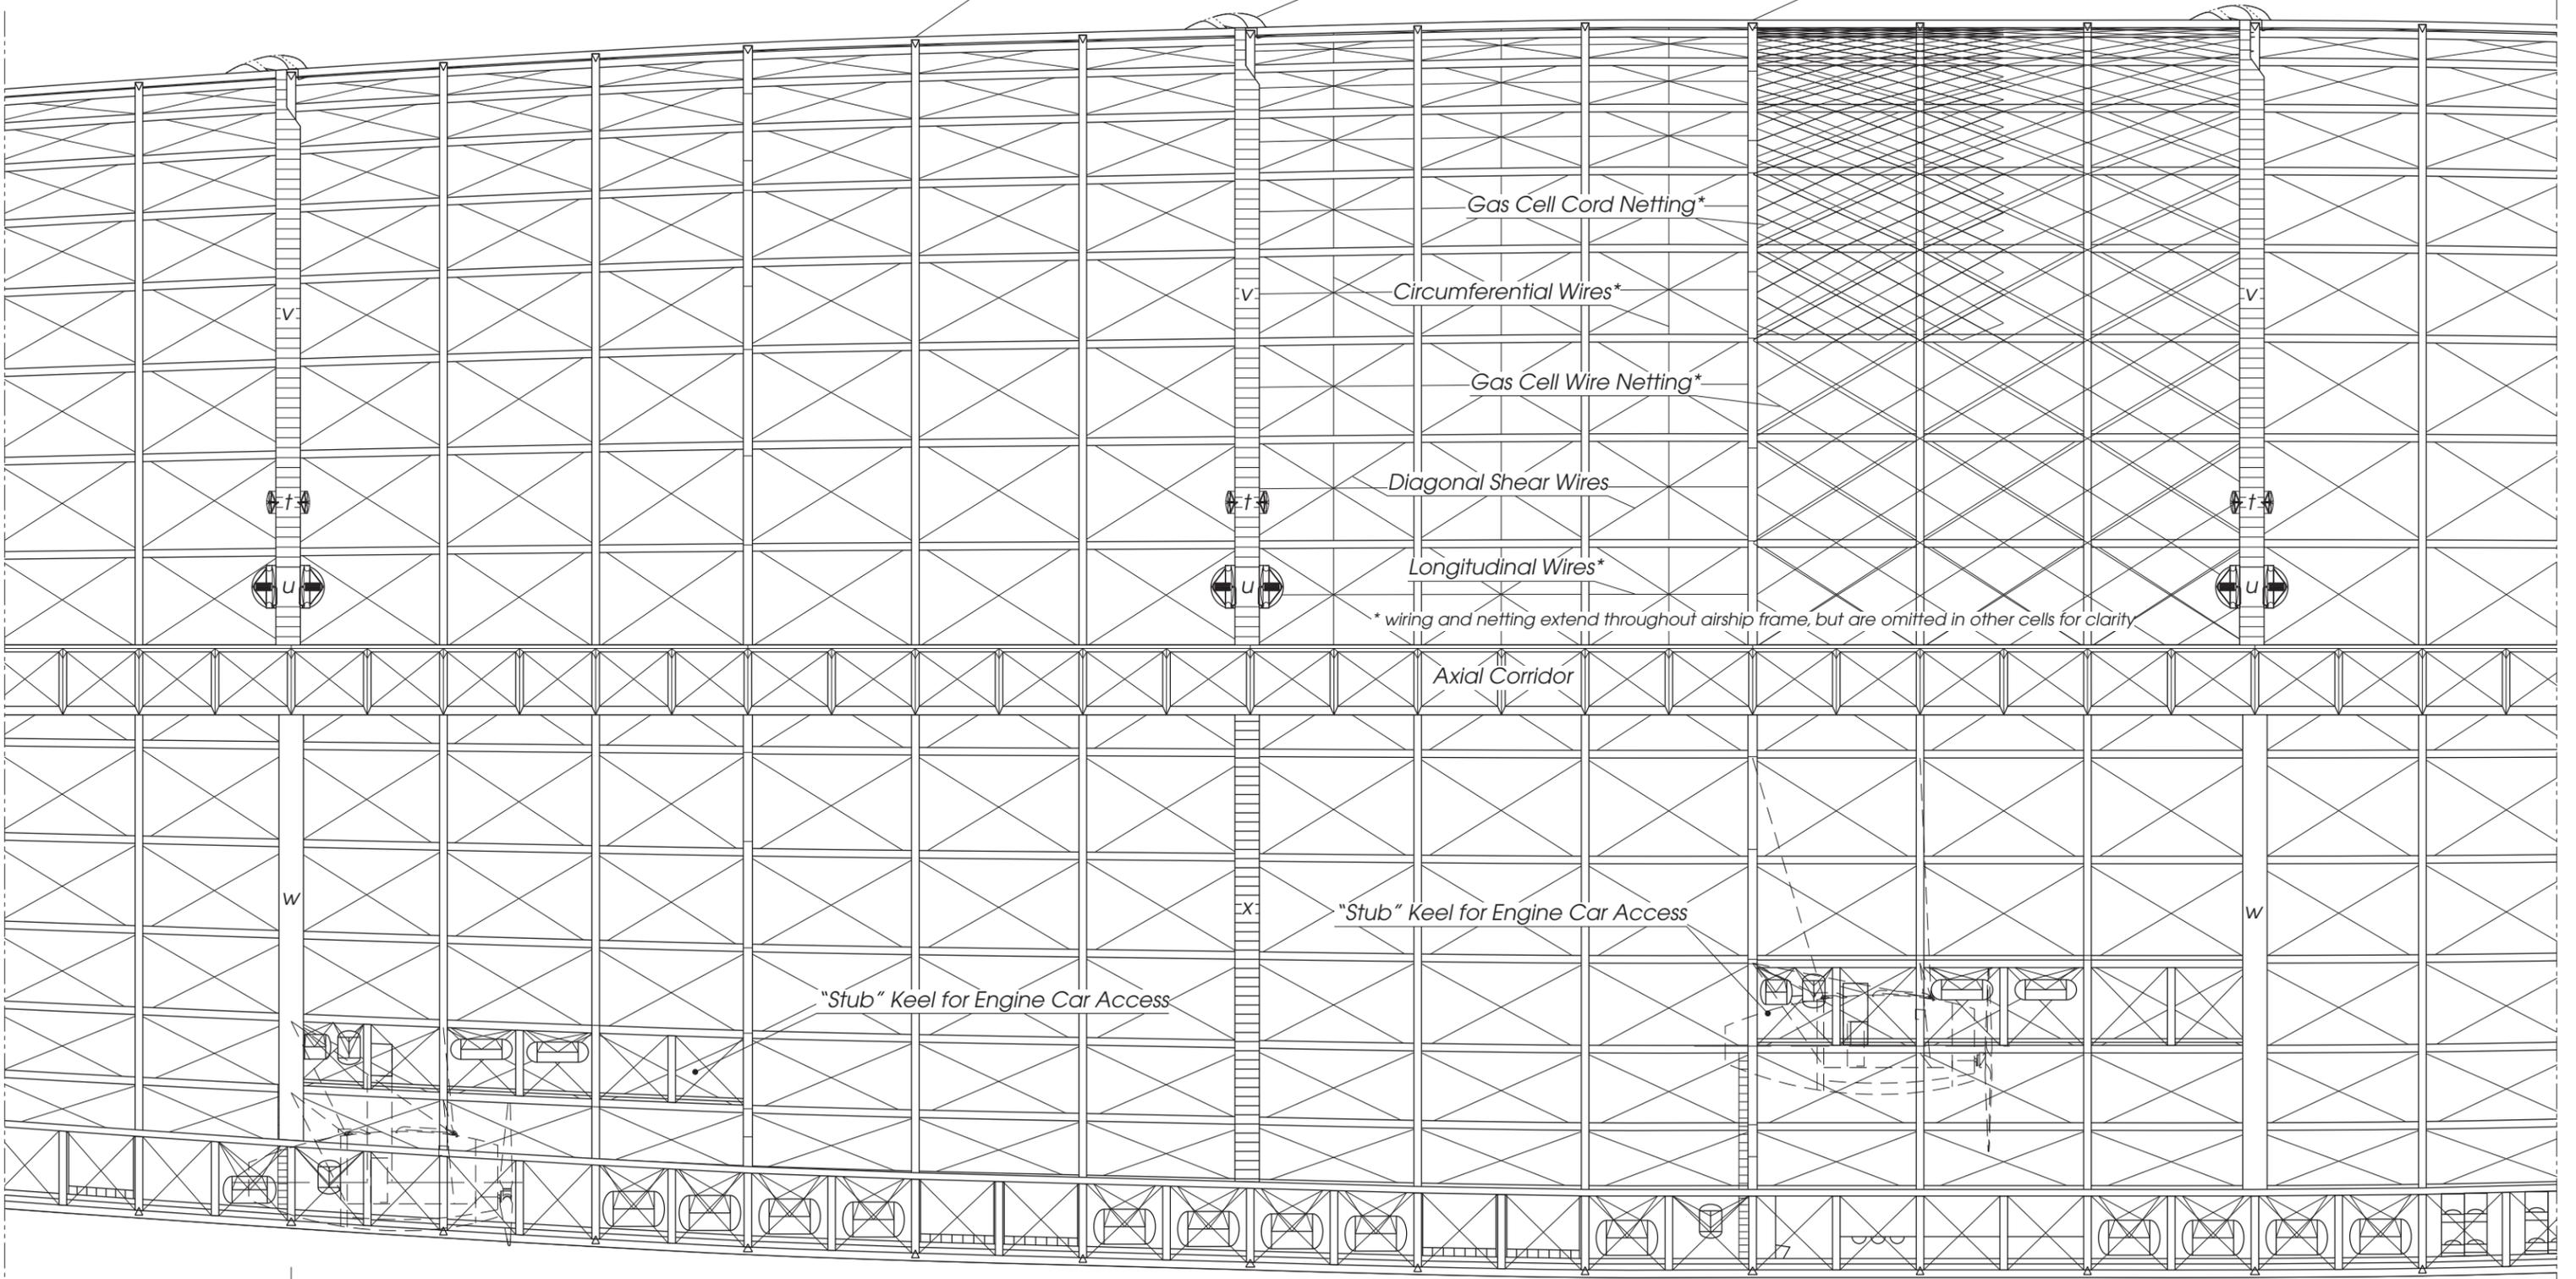

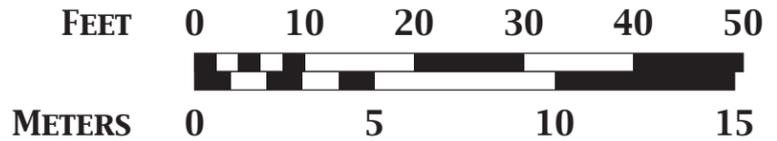

Main Ring construction of the Tail Fins is braced through the hull to the opposing Fin by the Tail Fin Cruciform Structure

Main Ribs constructed using triangular girders;
Intermediate ribs constructed using flat girders

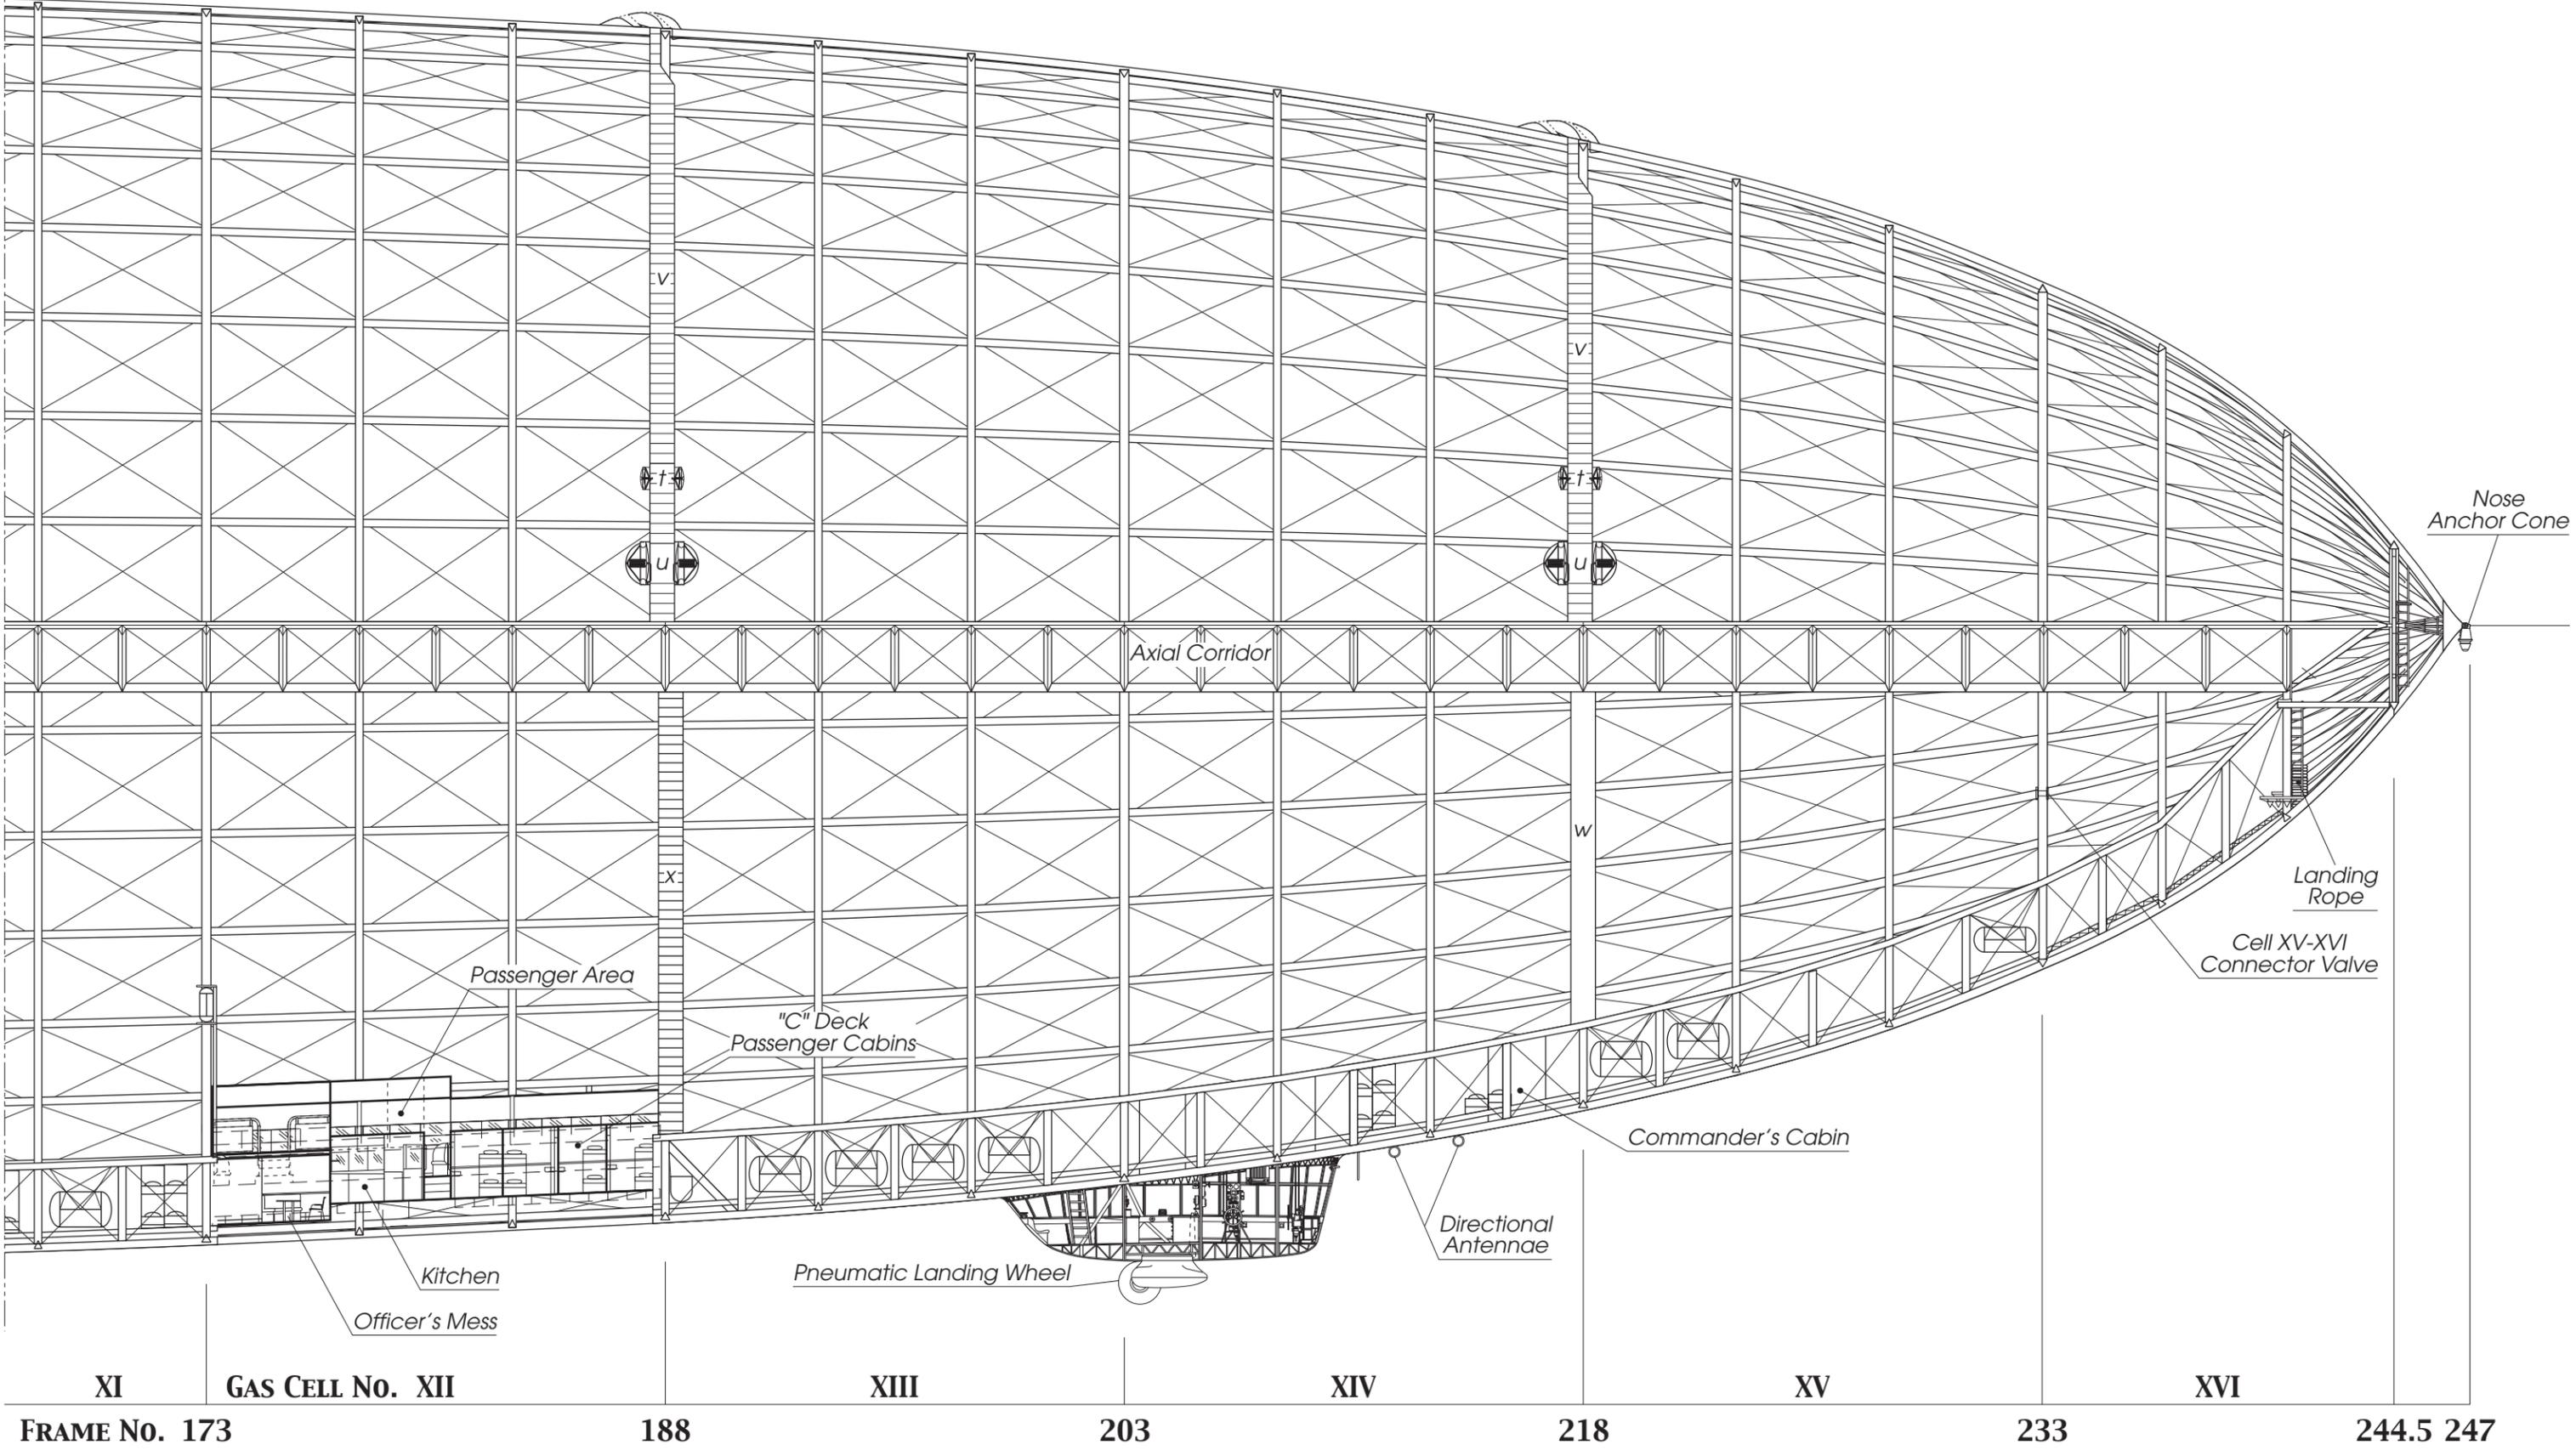

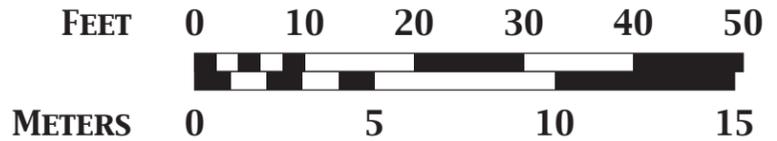

Tests showed that most of the stress was on the leading edge of the fin, so the intermediate ribs were reduced in number from the center to the trailing edge to save weight.

**Explanation of Letters on Longitudinal
Cross Section and Plan Views**

a ₁	Fuel Oil Barrels (2,500 liters) (28)
a ₂	Fuel Oil Valve Barrels (2,500 Liters) (4)
a ₃	Fuel Oil Operation Barrels (800 liters) (4)
a ₄	Fuel Oil Barrels (1,250 liters) (4)
a ₅	Fuel Oil Barrels (850 liters) (2)
b ₁	Lubrication Oil Barrels (500 liters) (6)
b ₂	Lubrication Oil Barrels (380 liters) (4)
c	Drinking Water Barrel (2,500 liters)
c ₁	Passenger Drinking Water Barrels (200 Liters) (2) (elevated to maintain faucet pressure)
d	Fresh Water Barrels (2,500 liters) (2)
e	Waste Water Barrels (2,500 liters) (2)
f ₁	Barrels for Recovered Ballast Water (2,500 liters) (9)
f ₂	Barrels for Recovered Ballast Water (2,000 liters) (2)
g	Double Ballast Bags (500 liters) (4)
h	Cooling Water Barrels (400 liters) (4)
i	Baggage Room (500 kg) (2)
k	Spare Parts Storage Room (500 kg) (2)
l	Food/Storage Room (500 kg)
m	Food/Storage Room (250 kg)
n	Engineer's Room
o	Exhaust
p	Washroom and Toilet
q	Workshop
r	Access Way to Engine Cars (4)
s	Access Ways to Ballast Bags (4)
t	Maneuvering Valve (14)
u	Pressure Relief Valve (14)
